THE PROJECT

In bullet points, describe the problem this project aims to solve or the opportunity it aims to develop.

1. this project aims at the easement of maintaining the security of the close ones you wish to keep a tab on
2. it is built to be as user-friendly as possible so as to reach out to maximum people
3. it provides for the fastest possible way of reaching the source in a situation of need

THE HISTORY

In bullet points, describe the current situation.

Commercial or Cargo, flights almost always include our most valuable possessions may they be people or objects. having a constant connection to any desired aeroplane will give people a sense of security and relief about their safety. Consistent tracking will keep the user informed about the whereabouts of the flights besides making it more mainstream than ever so that even the most novice of a person can handle it with the most ease.

LIMITATIONS

List what could prevent the success of the project, such as the need for expensive equipment, bad weather, lack of special training, etc.

the tracker can't make arrangements for the person to reach physically in case of a mishap.
it would be challenging to stand out in a sea of similar applications.
bad weather might make it difficult to get accurate data.

APPROACH

List what is needed to complete the project.

basic knowledge of python and connecting APIs.
